                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      protein - protein search, using sw model
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

GENERAL INFORMATION:

APPLICANT: Abbott Laboratories

APPLICANT: Magnuson, Michael T.

APPLICANT: Magnuson, Scott R.

APPLICANT: Magnuson, Scott R.

APPLICANT: Magnuson, Scott R.

APPLICANT: Magnuson, Scott R.

TITLE OF INVENTION: HUMAN MATRIX METALLOPROTEASE GENE,

TITLE OF INVENTION: PROTEINS ENCODED THEREFROM AND METHOD

TITLE OF INVENTION: OF USING SAME

FILE REFERENCE: 6073.US.F1

CURRENT APPLICATION NUMBER: US/09/391,104

CURRENT FILING DATE: 1999-09-07

PRIOR APPLICATION NUMBER: US/08/814,394
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           GENERAL INFORMATION:

Sequence 2, Application US/09171545

; Sequence 2, Application US/09171545

; Patent No. 6566116

; GENERAL INFORMATION:

; APPLICANT: Koji, Yoshimura

APPLICANT: Koji, Yoshimura

APPLICANT: Atsushi, Nishimura

; TITLE OF INVENTION: NOVEL PROTEINS, THEIR PRODUCTION AND

; FILE REFERENCE: 48712/342

; CURRENT APPLICATION NUMBER: US/09/171,545

; CURRENT FILING DATE: 1999-07-26

; NUMBER OF SEQ ID NOS: 23

; SOFTWARE: Patentin Ver. 2.1

; SEQ ID NO 2

; LENGTH: 517

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           839
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             779
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               719
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Sequence 1, Application US/09391104

Patent No. 6399371 6-4-02

GENERAL INFORMATION:

APPLICANT: Abbott Laboratories

APPLICANT: Falduto, Michael T.

APPLICANT: Magnuson, Scott R.

APPLICANT: Magnuson, Scott R.

APPLICANT: Morgan, Douglas W.

TITLE OF INVENTION: HUMAN MATRIX METALLOPROTEASE GENE,

TITLE OF INVENTION: PROTEINS ENCODED THEREFROM AND METHODS

TITLE OF INVENTION: OF USING SAME

FILE REFERENCE: 6073 US.P1

CURRENT APPLICATION NUMBER: US/09/391,104

CURRENT FILLING DATE: 1999-09-07

PRIOR APPLICATION NUMBER: US 08/814,394

PRIOR APPLICATION NUMBER: US 08/814,394

PRIOR FILING DATE: 1997-03-11

SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; SEQ ID NO 1

Sequence 13, Application US/09950510

Patent No. 6740514

GENERAL INFORMATION:
APPLICANT: Curtib, Rory
ITILE OF INVENTION: 46798, A No. 6740514el H
FILE REFERENCE: 10147-45Ul
CURRENT APPLICATION NUMBER: US/09/950,510
CURRENT FILING DATE: 2001-09-10
PRIOR APPLICATION NUMBER: 60/251,156
PRIOR APPLICATION NUMBER: 60/251,156
PRIOR FILING DATE: 2000-09-08
INUMBER OF SEQ ID NOS: 24
SOFTWARE: Patentin version 3.0
SEQ ID NO 13
LENGTH: 1335
TYPE: DNA
CORGANISM: Homo Sapiens
US-09-950-510-13
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Percent Similarity:
